

CMPDI Annual Geological Survey Report 2023

CMPDI / Coal India Limited - Confidential Internal Document

Section 1: Executive Summary

This Annual Geological Survey Report has been prepared by the Central Mine Planning and Design Institute (CMPDI),

India's total coal reserves stand at 361.30 billion tonnes as of April 2023, as per the Geological Survey of

The survey covered 4,218 boreholes across 62 coalfield blocks. Total core recovery averaged 91.4%, indicating

Coal rank distribution shows that coking coal constitutes 18.4% of total reserves, with prime coking coal

Section 2: Reserve Estimates by Region

Eastern Coalfields Region (ECL + BCCL):

Central Coalfields Region (CCL):

Northern Coalfields Region (NCL):

Mahanadi Coalfields Region (MCL):

South Eastern Coalfields Region (SECL):

Western Coalfields Region (WCL):

National total proven coal reserves: 148.46 billion tonnes (GSI, April 2023)

Section 3: Seam Characteristics and Stratigraphy

Jharia Coalfield - Seam Analysis:

Stratigraphy: The Jharia coalfield belongs to the Lower Gondwana (Barakar and Barren Measures) formation.

Methane content and drainage:

Singrauli Coalfield - Seam Analysis:

Section 4: Borehole Survey Results and Data Quality

Borehole Programme 2022-23:

Data quality metrics:

Errors and discrepancies:

Historical data reconciliation:
