

# National Coal Reserve Estimation Report - India 2023

CMPDI / Coal India Limited - Confidential Internal Document

## Section 1: National Reserve Summary

National Coal Reserve and Resource Estimation - India (as of April 2023)

India holds the fourth largest coal reserves in the world after USA, Russia, and Australia.

Category-wise breakdown:

State-wise distribution of total coal resources:

Depth-wise distribution of reserves:

## **Section 2: Coking Coal Reserves - Detailed Analysis**

Coking Coal Reserves - India 2023

India's coking coal reserves are critical for the domestic steel industry. The country imports

Total prime coking coal reserves: 6.03 BT

Total medium coking coal reserves: 4.71 BT

Total semi-coking coal reserves: 23.12 BT

Quality parameters of India's prime coking coal:

Import dependency analysis:

Future reserve development:

### **Section 3: Production Forecast and Demand**

Coal Production Forecast and Demand Projection - India

Historical production:

Sector-wise coal demand projections (Planning Commission/NITI Aayog):

CIL production target trajectory:

Reserve adequacy at projected production rates:

OBR Ratio national average for opencast mines: 3.8 cubic metres per tonne of coal.
