

Geological Borehole Survey - Singrauli Coalfield 2022

CMPDI / Coal India Limited - Confidential Internal Document

Section 1: Survey Scope and Methodology

Geological Borehole Survey Report - Singrauli Super Critical Coalfield, 2022

Survey scope:

Boreholes drilled (FY2021-22 programme): 486 new boreholes

Field teams: 12 geological parties; each supervised by a Senior Geologist (Grade E3 or above)

Section 2: Seam Thickness and Reserve Estimates

Singrauli Coalfield - Seam Thickness Data (2022 Survey):

Principal coal seams in Singrauli coalfield:

National significance of Seam III (Turra) and Seam IV (Dudhichua):

Updated reserve estimates (post-2022 survey):

Coal quality:

Section 3: Hydrogeology and Environmental Baseline

Hydrogeology - Singrauli Coalfield 2022:

Aquifer characterisation:

Mine water inflow rates:

Subsidence monitoring:

Baseline ecological survey:
