

Jharia Coalfield - Comprehensive Resource Assessment 2022

CMPDI / Coal India Limited - Confidential Internal Document

Section 1: Introduction and Scope

This Comprehensive Resource Assessment of the Jharia Coalfield has been prepared by CMPDI on behalf of

Geographic extent: 456 sq. km, spanning the Damodar Valley.

Geological Formation:

Section 2: Reserve and Resource Estimates

Coal Reserve Classification (as per UNFC 2009 and GSI classification):

Proved Reserves:

Indicated Resources:

Inferred Resources:

National Significance:

Seam inventory:

Section 3: Seam-wise Quality Parameters

Coal Quality - Jharia Coalfield Average Parameters:

Prime Coking Coal seams (I-IV, parts of IX):

Non-coking and semi-coking seams (V-XIV, parts):

Quality degradation trends:

Sulphur content: Generally < 1.0% (average 0.54%) - favourable for coking use.

Section 4: Underground Fire and Safety

Underground Fire Management - Jharia Coalfield:

Fire control measures implemented:

Methane Drainage:

Spontaneous Heating:
